

## Submitting images:

In the first instance please email 10 low resolution jpegs (1024px on the longest side) to [photographer.submissions@rspb.org.uk](mailto:photographer.submissions@rspb.org.uk) and make the subject of your email 'New photographer submission: (Your Name)'.

Please answer the following questions in the body of the email:

1. How many images do you have to submit?
2. What photographic equipment do you use?
3. What would you consider your specialist area of photography to be?

Please ensure the total size of your initial email of low-res images is under 5MB.

You will receive a response within 2-4 weeks, but due to the high volume of prospective submissions, we regret that we are unable to comment in detail on individual submissions.

If we think your work may be suitable for our collection you will be asked to submit a further 100 low-resolution images and 10 high resolution TIFFs, processed to our specifications for consideration by our selection team. Those photographers who are selected for representation by RSPB Images will be offered a contract and will be invited to submit images on a bi-monthly basis.

## Technical Specifications:

Should you be successful in your application you must be able to supply high-resolution files to the following specifications:

- JPEG files saved at maximum quality
- 300ppi
- Images should be in excess of 3625 pixels along the longest edge - please DO NOT interpolate files
- Colour space - Adobe RGB (1998)
- Files should be 8 bit
- Images should be cleaned at 100%
- Images should be colour corrected
- Files should be titled with a brief description of the image
- Images can only be sharpened at the RAW stage - Minimal sharpening only
- Name your disks - preferably with a CD writer pen, not labels
- Identify any composite work
- Please note: We DO NOT accept unscanned images
